

LED Flexible Strip HTD-RGT-3014-240

Description of products:

HTD-RGT-3014-240

- Constitute by FPC, SMD2835 240LEDs per meter and UV resistant silicone resin.
- The LED beam is 125-135° flood lighting, without the shadow, high brightness in 12-14lm/LED, low therm resistance, low Light failure, in a poor environment can good work.
- 24W/1M, the working voltage is DC24V.
- Optional: IP20/IP65/IP68 waterproof level. Warranty optinal 1/2/3/5 years.
- Main applications:
 - Commercial and residential decoration
 - Under-counter lighting
 - Media illumination
 - Large area backlighting
 - Small to medium channel letters
 - Point-of-sale displays
 - Used for Neon or tubes replacement, etc.

*Tips:

- When we computing power should retain 20% of the allowance.
- Up to 5 Meters HTD-RGT-3014-240 to use in one parallel. Screw holes on both ends to fixed, convenient and accurate.
- Advice that both ends connect DC24V power if must need 10M a string connect power supply, achieve the best use effect.

*LED module/Pixel light/Strip light Single color wiring diagram

*This product the most can tandem connection 20pcs module/50pcs pixel/5M strip, Prohibited beyond tandem connection. The thickness of power should according to actual possible present maximum current, the power of products, wiring length (suggest not exceeding 6M) and low voltage transmission line voltage drop. In measuring power use number of circumstances, should retain 20% of the allowance.

*(Important) Ensure that both ends connect power, achieve the best use effect. The module MAX 40pcs/string, Pixel MAX 100pcs/string, Strip MAX 10M/String.

***Installation guide**

1. Product labeled 3M two-side glue, stick in the need to install the position (please clean surface) can;
2. Installation using fixed installation clipper to buckle. 1 meter using 2 clippers and four M3 screws (Some styles just 2pcs).
